

## ENVIRONMENTAL POLICY

Sovena Group defined as its Purpose to accelerate the evolution of global food, building new paths in this context and, at the same time, adopting an Environmental Management System as the main pillar for a sustainable development.

Our actions are focused at local level and, in line with our environment protection commitment, our adherence to national and international commitments and compliance with applicable legislation.

Our goal is to ensure that Sovena Group's activities, products and services do not cause damage to the environment or have any adverse effect on human health. For that, we define the Commitments described below.

- Environmental protection, including pollution prevention, sustainable use of resources, mitigation and adaptation to climate change and protection of biodiversity and ecosystems:
  - Minimize the environmental impacts of the activities carried out, making a rational use of resources, giving priority to pollution prevention measures and adopting the best technologies available;
  - Foster a sustainable management of the value chain;
  - Assess the possibility of implementing environmental improvements whenever changes in processes, installations or products occur;
  - At R+D level, to develop environmentally friendly technologies, processes, products, and packaging materials.
- Compliance with legal obligations.
- Continuous improvement of the Environmental Management System to achieve an improved environmental performance.

Environmental Goals are established annually, communicated to the entire Organization, and periodically evaluated.

Sovena Group Management Board, as well as ALL its Collaborators, identify themselves with the Commitments set out, which represent the Environmental Awareness of the Organization and are committed to act with an approach that allows to achieve the established goals, enhancing in this way the importance of this document and all the provisions that are implicit.

By the Management Board,

April 2021
